## ZIMENKI SPACE TRACKING STATION

GORKIY, USSR

## SUMMARY

This report is one in a series of studies covering seven selected astronomical observatories within the USSR. The Zimenki Space Tracking Station is a relatively small facility under the Scientific Research Institute of Radiophysics in Gorkiy. It consists of two radiotelescopes with 50-foot-diameter parabolic antennas capable of both space tracking and radioastronomical observations.

## DISCUSSION

The Zimenki Space Tracking Station of the Scientific Research Institute of Radiophysics is located at 56-09N 44-17E, on the south bank of the Volga River approximately 13 nautical miles southeast of Gorkiy, USSR (Figure 1). The station has facilities for radioastronomical observations as well as satellite tracking.

25X1

Figures 2 and 3 show the station as it appeared on [redacted] Missions [redacted] Figures 5a and 5b are ground views showing details of radiotelescopes at the space tracking station [redacted]

25X1

25X1

The following annotations and information presented on Table 1 are keyed to the line drawing (Figure 4) which is based on photography of [redacted]

25X1

1. Instrumentation Building
2. Radiotelescope #1 - parabolic antenna (50-foot diameter)
3. Radiotelescope #2 - parabolic antenna (50-foot diameter)
- 4-10. Support/Instrumentation Buildings
- 11-12. Outline Undefined.

25X1

Analysis of photography [redacted] revealed no significant changes in the station. Ground scarring was observed east-southeast of Radiotelescope #1 on coverage of [redacted] [redacted] The latest usable coverage, [redacted] was snow covered, and it provided no new information pertaining to the ground scarring.
